DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Figures 1A, 1C, 1D, 1F, 1H, 2, 3, 4A, 4B, 4D, 4E, 4F, 5C, 5D, 5E, 6A, and 6C.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Figure 1A: claims 1-8, 19-21, 28, and 32-41.

Figure 1C, 4A, 4B: claims 1, 9

Figure 1D: claims 1, 6, 14

Art Unit: 2826

Figure 1F: claims 1, 6, 15

Figure 1H: claims 1, 6, 11-13

Figures 2, 3: claims 1, 6, 18-21, 25, 26, 28

Figure 4B: claims 19, 22

Figure 4D: claims 19, 23

Figure 4E: claims 19, 24

Figure 4F: claims 1, 6, 10-13, 19-21, 28, 30, and 31

Figures 5C, 5D, 5E: claims 1, 28, 29

Figure 6A: claims 1, 6, 16, 17

Figure 6C: claims 1, 16

The following claim(s) are generic: none.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the shared special technical feature shared among the groups must make a contribution over the prior art. The groups require the special technical feature of first and second pn junctions and respective depths within a substrate corresponding to incident wavelength bands. However this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of EP 1005595, Merrill (USPN 5,965,875), JP 07-028136, and SU 1689768.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 2826

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
